

EASTEY INTRODUCES CASE TAPING SOLUTIONS FOR TALL AND NARROW CASES

Sept. 1, 2017, Brooklyn Park, MN – EasteY Enterprises, a leading manufacturer of L-sealers, sleeve wrappers, shrink tunnels, bundling equipment, case tapers and material handling, introduces the TB-2 top and bottom belt case taper for sealing tall and narrow cases.

The operator friendly TB-2 top and bottom belt case taper is designed for large run case sealing. The top and bottom drives are ideal for tall and narrow uniform cases and heavier cases up to 85 lbs. No air is required to run the TB-2 case taping system so it can be placed anywhere in the plant.

Four drive belts work in unison to move users cases consistently through for a strong and consistent seal. TB-2 utilizes a dual mast with twin lead screws for greater tape head stability and adjustable side guides to center each case. The unit also features top compression rollers to stabilize the case and push the top flaps together, making it a great solution for over-filled cases. The system is designed to keep maintenance to a minimum and provide a fast and efficient alternative to hand taping.

TB-2 offers fast and easy case changes and flexibility for boxes 5” in length and greater. Adjustments can be made on the fly with easy hand tighten knobs and cranks. TB-2 utilizes Easy-Taper Quick-Load top and bottom tape cartridges and will seal boxes as narrow as 6.0” wide and as low as 4.5” tall.

The TB/2 is available now through EasteY Enterprises network of authorized distributors. Sales inquiries can be directed to Joshua Nelson, EasteY Enterprises, 7041 Boone Avenue, Brooklyn Park, MN 55428, 1-800-835-9344.

Eastey operates as a subsidiary of Engage Technologies Corporation, parent company of Squid Ink, Eastey Enterprises, AFM, and Cogent Technologies. Squid Ink (www.squidink.com) is a leading manufacturer of superior quality inks and ink jet printing equipment. American Film & Manufacturing (www.afmsleeves.com) manufactures and supplies shrink sleeves and shrink labeling solutions. Cogent Technologies (www.cogent-tech.com) manufactures infrared drying systems used to dry ink in the industrial and graphics industries.
