## **RELIABLE AUTOMATIC L-SEALING FROM EASTEY ENTERPRISES**

January 1, 2017, Brooklyn Park, MN – Easteys Enterprises, a leading manufacturer of L-sealers, sleeve wrappers, shrink tunnels, bundling equipment, case tapers and material handling equipment, introduces the Value Series Auto L-Sealer designed for entry-level or immediate automatic sealing applications.

The Value Series Auto L-Sealers offer the durability and functionality needed to handle a variety of applications efficiently. Each machine features a 12 gauge steel all-welded main frame and seal head equipped with pneumatic air cylinder for automatic and consistent pressure across the seal bar. The hot knife seal bar will seal most polyolefin, polyethylene, and PVC shrink films with a consistent and clean seal and the film tracking wheels keep the film in place while the multiple pin perforator provides precise air evacuation; the end result is a professionally sealed package every time.

Easteys Auto L-Sealer is available in two models: the VSA1721 and VSA2530. The VSA1721 features a 17" x 21" seal area while the VSA2530 provides a slightly larger seal area measuring 25" x 30" to accommodate larger packages. Both models are equipped with heavy-duty leveling legs and casters for easy transportation within the plant, offering a portable solution for manufacturers needing automatic l-sealing without requiring valuable floor space.

The Value Series Auto L-Sealer is available now through Easteys Enterprises network of authorized distributors. Sales inquiries can be directed to Joshua Nelson, Easteys Enterprises, 7041 Boone Avenue, Brooklyn Park, MN 55428, 1-800-835-9344.

Easteys operates as a subsidiary of Engage Technologies Corporation, parent company of Squid Ink, Easteys Enterprises, AFM, and Cogent Technologies. Squid Ink

([www.squidink.com](http://www.squidink.com)) is a leading manufacturer of superior quality inks and ink jet printing equipment. American Film & Manufacturing ([www.afmsleeves.com](http://www.afmsleeves.com)) manufactures and supplies shrink sleeves and shrink labeling solutions. Cogent Technologies ([www.cogent-tech.com](http://www.cogent-tech.com)) manufactures infrared drying systems used to dry ink in the industrial and graphics industries.
